Skills

Language

French: Native proficiency

Polish: Native proficiency

English: Fluent

Italian: B1 level (currently learning)

Neuroimaging

Although I have received a formal training in MRI-related techniques (see [Additional Training](#)), my focus and main expertise lies with electrophysiological data, including **EEG**, **biosignals** (EDA, ECG and EMG) and their multimodal integration.

- **NeuroKit** (*main author*): Open-source python module for statistics and neurophysiological signal processing (EEG, EDA, ECG, EMG...).

Statistics / Data Science

I use **R**, **Python** and **Julia** for data analysis. My knowledge is oriented toward the fields of *structural modelling* (mixed-effects models and structural equations) and *predictive modelling* (machine learning and deep learning). I'm more generally interested in best practices in statistics (Bayesian framework, reporting, reproducibility, open-source solutions) and their use in psychology and neuroscience.

- **easystats** (*main author*): Collection of R packages to facilitate the usage of best methodological practices and statistical tools.
- **psycho** (*main author*): R package implementing specific functions commonly used in psychological science.

Programming

I use **Python** on a daily basis and have a working knowledge of **MatlabTM**. I'm also familiar with traditional experiment creation tools such as **E-prime[®]**, **PsychoPy[®]** or **OpenSesame[®]**.

- **Neuropsychia** (*main author*): Open-source python module for creating experiments, tasks and questionnaires (see technical publications).
